### Q4

Please share any comments below:

If you would take a step back look at all the data, your own data, the studies I've posted above, links and research papers from well-known scientist and doctors. You will see that regardless of your mask mandate cases would have climbed until they plateaued once a plateau they fall off and go down because of herd immunity. Cloth mask and surgical mask will not stop a virus! Stop living in fear of a virus. What did the CDC study show about the study on people that wore a mask first didn't wear mask and those that contracted covid19. You're more likely to contract the virus wearing a mask than not wearing a mask.

My father is a resident of a nursing home and currently is very ill with covid. He has watched the controversy on his television, you can imagine the fear he's lived with these past few months, knowing there was a deadly virus raging outside his door and seeing people on TV and in the Missourian, complaining about wearing masks and minimizing the deaths as 'only old people'. Please stand strong against the anti-mask brigade, most of them appear to be from the age groups with the most covid cases and they do not speak for the rest of us. We want the mandate to continue until the numbers go down substantially. Also grateful for all that you all are doing, what a nightmare we've all found ourselves in this year. Thank you

I'd like to begin by saying thank you. Being on the Health Center Board at any time is a thankless job but during a pandemic, it is a job that requires thick skin and an unwavering belief in science. As an educator and a caretaker of a disabled, elderly parent, I beg you to keep the mask mandate in effect until our positivity rates have declined significantly and community spread has diminished. While some may ignore the mask mandate in the community, most people do wear their masks and it makes my job and my errands so much safer for me and more importantly my mother. The vocal minority gets most of the attention unfortunately but please know the quiet majority is extremely appreciative of the mask mandate, flu shot clinics, COVID data released on social media and the many, many tasks you do daily. Thank you.

Please extend the mask ordinance, as our county, state and country are still seeing a surge in cases. As a business owner, this ordinance makes it easier to require masks in our store. We have several employees who are immunocompromised and would not feel comfortable working if we don't require masks. I have a number of customers who appreciate the mask requirements. I have also had a number of people in the store who have acted very disrespectfully to our staff. We will continue to require masks, but it is easier if there is a mandate. Thank you for all you are doing.

Page 1

**Q1**

Please share any comments below:

Covid contact tracing is not being done very efficiently. I was exposed. I knew it and self-quarantined. The health dept emailed a letter a couple days later to inform me of the exposure, but it was emailed to the person I was exposed to, I was never contacted. I didn't find out about the emailed letter for several days. My son-in-law tested positive in Cape Sept 28th and was never contacted at all for contact tracing. My daughter tested positive in Cape Oct 12th and was just contacted today, Oct 19th, but was told her case would be referred to Scott County and someone from there should contact her in a day or two. (She works in Cape and tested in Cape but lives in Scott County.) Her isolation period will probably be over within a day of someone doing any contact tracing, if they do at all. This is concerning for infection control in Cape and surrounding areas.

---

**Q2**

Please share any comments below:

When someone tests positive, their household is expected to quarantine for 14 days after the positive test date. If anyone becomes symptomatic and tests positive during that time, they must isolate ten more days after their positive test date. That's a potential of 24 days off work or school. (This exact scenario happened in our family) There may not be a way to shorten this, but If all members of a household were tested as soon as someone in the home tested positive, you could catch others who might have been positive with mild or no symptoms, shortening their total isolation. Negatives should be re-tested on day 14 to confirm they aren't now positive. Wouldn't always make a difference, but it could. If negative at first, they'd quarantine 14 days, but if positive on day one, that could shorten their time off to ten days.

---

**Q3**

Please share any comments below:

Thank you for continuing the mask mandate. It's not perfect, but it's the best we can do right now. When it's not a mandate, even people who are willing to comply are less likely to do so when no one else is masked.

As an educator at a public school, I respectfully request an extension of the mask mandate. I believe, among other procedures in place by our district administration, masks have helped keep our students in school. Students need this face -to-face-educational opportunity not only for their social and emotional wellbeing, but for their mental health as well.  
Keeping the mandate in place will eliminate additional strain, to an already stressed situation. Without a county mandate, the public would undoubtedly place scrutiny on administrative teams to continue this protocol in hopes of keeping students in school for as long as possible.

It is important to keep the mask mandate in effect especially to protect older adults like me and to prevent the number of COVID cases from drastically escalating. People are tired of masking but COVID has proven that it doesn't care about that.

**Q1**

Please share any comments below:

My family and I appreciate all the hard work the board performs, and we're so sorry that you've had to deal with so much hostility about the mask mandate. Please keep the mask mandate in place. I'm sure more people would attend monthly meetings in favor of the mask mandate, but honestly from watching it from the live stream, I would be somewhat fearful of retaliation from the hostile anti-mask group. I'm confident that the silent majority are in favor of the mandate.

**Q2**

Please share any comments below:

I live in Cape Girardeau county but work in Scott county. I will no longer do any business in Scott county due to workers and customers not wearing masks, and basically not taking any precautions in general.  
The idea that citizens will wear masks if "encouraged" instead of mandated is completely false. One trip to Scott county businesses is proof of that.  
Please keep the mask mandate and thank you once again for all your hard work. I'm sure it may seem thankless at times, but I assure you that I, as well as many others I've spoken to, are very appreciative.

**Q1**

Please share any comments below:

Please continue the mask mandate. I know it may seem like the general public is mostly against these simple public health measures, but that is simply not true. I would come and speak for the mask mandate, but the room will be filled with people who refuse to wear a mask and are very angry. Therefore, they are putting everyone in the room at risk.

**Q2**

Please share any comments below:

Please, please partner with responsible medical professionals and local news media to educate the public and refute the misinformation. Communicate, communicate, communicate. Please explain to them how much worse our new cases, hospitalizations, and deaths would be without the mask mandate and other precautions. Explain in a simple way the detrimental effects of exponential spread on the economy, In-person school, and access to healthcare for other non-Covid medical issues. Encourage us to work together to keep our businesses and schools open and flourishing.

I am high risk and always wear my mask, but I have been made aware by several doctors, including ER drs and one infectious disease specialist that the mask protects others. So if others stop.. I am no longer safe in public.

---

**Q2**

Please share any comments below:

Its like this..if we are all naked and someone pees on you.. You're going to get wet. If you are wearing pants.. Its won't be as bad, but you'll still get wet. But.. If the person peeing is wearing pants, the pee will stay with him and you won't be affected at all. Therefore.. Everyone should wear a mask.

---

**Q3**

Please share any comments below:

Its not different from wearing your seatbelt or turning your headlights on when its dark. Its something you do to protect yourself and others.

---

**Q4**

Please share any comments below:

I'm tired of people whining and crying that they can't wear a mask. I have COPD and my lungs are scarred from a disease I had as a child, I can wear one to the store or wherever I need to go to keep others safe.. So everyone else can stop crying and complaining.. That its hard.. If they don't like wearing a mask. They sure aren't going to like a ventilator. Or seeing a loved one on one.

**Q1**

Please share any comments below:

I am against the mask mandate. We do have cases of covid, but it doesn't mean it's a death sentence. It highly effects the elder. Children and young adults are not affected as bad. It makes more sense to wear a mask in a medical setting. Let the people of caoe decide if they want to wear a mask or not. No one is ordered to wear masks during flu/pneumonia season. When you look at numbers, true or false, the death toll is nowhere near the amount of cases. More people are surviving the virus than not. That is why it should be a choice, not a requirement. Many people are wearing them incorrectly, which could mean death numbers should be higher, but they're not. Do away with the mandate and let the people make the decision to wear them or not.

I think that the masks are not helping , 76%of people that adhere to the masks order got covid19 they did everything they were told to do and still got the virus , people also don't wear them right and they keep playing with the mask , plus the bacteria on the mask that they wear some more then 8 hrs makes them more susceptible to other viruses , so my recommendation is to let the individual person decide when to wear the masks , i doesn't wear a mask since the beginning of this virus and i have NO SYMPTOMS and i have been out to several stores around many people. No mask

I welcomed the mask mandate order and have followed it's guidelines. However I am frequently seeing more and more individuals not complying and choosing to walk into establishments with no mask on and when confronted telling store employees they will not put on a mask. I have personally seen one business in Cape Girardeau ask a couple to leave the store. The whole problem with the mask order is there is no penalty for non compliance that I am aware of. The dog doesn't bite because it has no teeth.

**Q1**

Please share any comments below:

Dr Scott Atlas from the White House task force states, per the CDC, widespread mask usage is not effective and in fact can cause other types of harm. It is only recommended for those who are high risk AND in areas of high risk such as crowded venues, etc. The mask mandate has been in effect since July and numbers in this area have only increased. So does it work or not? If it works, the numbers should have went down. If it doesn't , then remove it and allow people to again exercise personal responsibility regarding their own safety and restore the public's faith that you are able to reasonably and logically adjust to scientific information and outcomes and aren't just and bunch of power grabbing bureaucrats who are beholden to the unreasonable hysteria perpetrated by those with another agenda.

I do not think the mask mandate should be extended. It clearly isn't working. People should be free to choose if they want to wear one. I beleive, just like the flu, at some point, everyone will catch this virus. If you have health issues and feel safer wearing one, then that is your right but I do not feel it is right to force the rest of the public to do so.

Thank you for taking on the difficult task of implementing the mask mandate.  
I hope you will consider extending it for at least another month.  
Since I work retail, and would be much more comfortable if it lasted until flu season is over NEXT year.  
I would love to come to the meeting to voice my appreciation, but after watching how badly the audience behaved at the September meeting, I wouldn't feel safe attending in person.

While I agree a mask can help, they are not fool proof. People do not & will not wear them properly nor do they wash hands or properly sanitize. For this to work EVERYONE must wear them correctly, launder them frequently, otherwise, they hold nothing but germs, most people have a hard time breathing in them. I think the order should be allowed to expire.

Q1

Please share any comments below:

Re: mask mandate... As an RN in cape county for nearly 30 years I can absolutely say removing the mandate should not even be up for serious debate. If this community actually cared enough about the scientific logic in minimizing one's own droplet spread, we wouldn't need a mandate because people would gladly mask (and distance) for our collective community well being. Sadly, that is not the case. Please continue the mandate in the interest of public safety and please make it clear it is not to protect the mask wearer but to protect others if the wearer is infectious. Public awareness is key and too many people here have been convinced by anti science disinformation and propaganda that masking and limiting gatherings are constitutionally wrong. Community health should never be politicized but here we are... A campaign blitz of "keep droplets to yourself" throughout the county would be helpful, unless it's too late. Winter and all the growing indoor gatherings are going to leave empty chairs at the table when it is once again safe to gather. Sadly, it seems, saving people from themselves has become necessary. Thank you sincerely for considering my comments.

The mask mandate needs to be put in place and kept there - Covid is spreading, and more and more people are dying. Wearing a mask, social distancing, and limiting gatherings to a reasonable number are what we as citizens can do to protect ourselves, and others in our community. We wear a seatbelt to stay safe in a car, if you don't want to start a family you wear a condom - the list goes ON AND ON.... It's simple - and it makes life safer until they can get an immunization that will be effective. It's common sense...it's TIME! Thanks!

PLEASE STOP discontinue the mask mandate. There continues to be ZERO data to support that masks are reducing the spread. After months of the mandate, there are county spikes of positive COVID cases. If the masks truly worked, you would see a decrease in cases. This is not the case. People need to take responsibility for their own individual health. I am friends with many of our community leaders and they privately express that they are NOT for continuing this unproven mandate. LISTEN to the citizens. We are educated people!

As a Cape Girardeau citizen who is at high risk for contracting Covid-19, I would personally like to see the mask mandate extended. I am a Type 2 diabetic who unfortunately is unable to work from home. I do my best to stay away from crowds, and when I am in public, I am wearing my mask. It makes no sense to lift this mandate at this point in time. Cases are again on the rise as people has begun to grow bored with the pandemic. We can't wish this away. Masks aren't fun to wear, but it is our civic duty to protect all of our citizens. Thank You.

The mask mandate doesn't seem to be having a significant impact when you compare our county to surrounding counties in the region. Allow businesses and organizations to make the policy decision for themselves.

---

**Q2**

Please share any comments below:

In my workplace, we handle items shipped to and from locations throughout the US and around the world, as well as locally. We had zero positive cases among employees who were lax on masks and social distancing. We have had 4 positive cases since our workplace stiffened the enforcement of the policies. Hygiene, herd immunity and common sense about avoiding contact with those most vulnerable is how we get through this.

Please do not even consider lifting the mask requirement. I watched the last meeting where this was considered. The arguments against masking had very little validity and the speakers in favor of stopping masks were so smug and self righteous. I hope they never have to go through this virus or lose someone due to it. They would change their thinking. Thank God for the masks! They save lives. This is or should be nonarguable at this point.

I see people in Walmart without mask whenever I go there so I use the curbside pickup, there should be a way of inforceing the rule that is in place. People don't seem to care about anyone not even themselves. I have been in a couple stores where the clerk wasn't masked. I would extend the order and come up with a way to enforce it sense some people insist on risking their life and the lives of everyone around them.

Please share any comments below:

If the mask mandate is canceled people will go back to acting as though we are not in a pandemic more than they already do. We know that wearing a mask and social distancing helps prevent the spread so we need to continue wearing a mask. I feel safer going out when I have to knowing that most people will be wearing a mask since I am in the high risk group.

---

**Q2**

Please share any comments below:

I know that because of the mask mandate that my grandchildren will be wearing a mask when they go out but if it is canceled it will become more worrisome for me to be with them for fear they didn't wear a mask when they went out.

---

**Q3**

Please share any comments below:

With the holidays coming up it will be a huge mistake to cancel the mandate. All healthcare providers are having to risk their lives taking care of these people who act or think the pandemic is not a big deal. We need the mask mandate to help protect the healthcare providers so they have fewer people to exposed them to the virus. They do not have a choice as to rather to take care of the covid patients it's their job so we need to do our part to protect them by wearing a mask.

---

**Q4**

Please share any comments below:

People carry on about it being a right not to wear a mask not realizing or caring about how if they don't wear one they are risking the lives of those who are at risk. Those of us who are at risk have a right to live. I'm asking you to please don't cancel the mask mandate it is saving lives.

**Q1**

Please share any comments below:

As many as 40% of people infected with the virus that causes COVID-19 may have no symptoms. But when they talk, cough or sneeze, they can still spread the virus to others in the form of respiratory droplets expelled into the air. Those droplets evaporate into fine particles that may linger. The mask traps these larger droplets before they can evaporate. So, wearing a mask regularly can prevent spreading at the source even when we don't know we are sick.

---

**Q2**

Please share any comments below:

Trapping droplets with the mask means not nearly as many viral particles escape. So, when all parties in a gathering are wearing well-constructed, well-fitting masks, it provides an extra layer of safety for everyone. If two people are wearing masks, the viral particles can travel about 5 feet away from each individual. When an infected person is not wearing a mask, those particles can float through the air 30 feet or more and stay alive for up to 30 hours.

---

**Q3**

Please share any comments below:

It would be unethical to assign people to not wear a mask during a pandemic.

Why would they even be considering lifting the mask requirement? My doctor told me when I left here office to be careful and wear your mask, and that 1 in 35 people in Cape County are infected with Covid. The only people who want the requirement lifted are those who consider Covid a political issue and not a health issue. With cases going up and not down, there shouldn't even be a question of lifting the mask requirement if you care about your family and others. If the requirement should be lifted, I would just stay home and order everything on-line.

Positive numbers of COVID are not accurate - hospitals and county's receive more funds the higher their COVID count is. So of course they will report higher numbers than real numbers. How many people die from the flu each year? This just needs to run its course. Our Immune system is adaptive and constantly learning and adapting and fights bacteria / viruses that change over time. Quit Instilling fear into everyone!  
This is ALL about control and conditioning. If YOU are that afraid - stay home. But DO NOT go against our constitutional rights. Please enter this into the minutes.

No masks this has gone on long enough. The CDC and Fauci have switched back and forth so many times on this matter. They have also stated more than once that the masks are not useful as the virus particles are so small the permeate the mask anyway. If people chose to wear them let may but for those of us that do not wish to we shouldn't be forced to!!!

Please continue and enforce the mask order. Some businesses are continuing to comply, while employees in other businesses are not wearing masks. We decided to go out of town to buy a \$1000 item, because the business employees that sold it in Cape were not wearing masks, nor worried about social distancing. We have to do what we can to stop the spread of this virus. It is only an inconvenience to wear a mask, and all studies that I can find show they are effective. I'd like to see more public endorsement of the mask order from the chamber, mayor, and prominent business people. We cannot let the virus continue to be a political issue.

As someone who must be out in the community helping others, I am extremely grateful for the mask mandate. I am certain it has protected my health and the health of my family members. Please continue!

---

**Q3**

Please share any comments below:

That our two largest public schools have been able to continue in-person learning is a testament to the schools and the county health board's mask mandate. With so many events canceled, it is even more imperative that our students retain the 'normalcy' of in-person learning. Please keep the mask mandate in place until an effective vaccine is available to all!

**Q1**

Please share any comments below:

The masks are still needed. People will say they don't help, you can still catch it with masks on everyone. Yes, some viral load still escapes, but if you can reduce it from 100% into the air, even to 50% in the air you have reduced chances of catching it. I believe the reduction is even greater but I won't make believe that I know more science than the experts. The masks need to remain mandatory.

---

**Q2**

Please share any comments below:

As we move into flu season combined with the Covid-19 virus, the use of masks becomes even more critical for the overall health of our public citizens.

---

**Q3**

Please share any comments below:

I know you take a lot of grief for the ordinance. But please know it is so helpful, not just for older folks, but everyone. Something like 60% of us have some type of pre-existing condition that would make us more susceptible to having a bad outcome if we contract it. I just wish you could make folks not only wear them but wear them correctly covering nose and mouth. In the doctor's office this morning, two folks had them on-over their mouths only. still was contaminating the air the rest of us were breathing.

---

**Q4**

Please share any comments below:

The fact that the county has the order makes it easier on the business owners to insist that customers wear them.

I just want to voice my support for the face mask mandate. I know it's always the people who don't like it that speak out so I want to express my support and appreciation that your board is following the advice of scientists and epidemiologists in mandating masks to mitigate the spread of Covid-19. With the constant increase in numbers, it's now more important than ever since it is one of the few mitigation strategies we have control over. I sincerely hope this mandate will be extended for the foreseeable future as long as we have rampant community spread in the county.

Please share any comments below:

I believe the mandate should be extended because the number of COVID cases in Cape County continues to increase but also decrease. The ultimate goal is to get the numbers down completely. I don't think that this will happen as quickly as possible because of those that do not wear mask where it is required such as stores. If some people wear mask, I believe all should. Those at greater risk are being put at risk by those that refuse. I work with children and all staff are required to wear them. This should be extended until at least the beginning of the year.

Please consider continuing the mask ordinance for Cape County. Our numbers don't give any indication that we should stop. This is not about "living in fear" for many of us, it is about being able to continue to go to work and continuing to help our parents. They are both over 80 years old and are not out and about since this began. I do their shopping for them and help with doctor's appointments. It's just about being safe and trying to get this virus on a downward trend for a significant period of time. Wearing a mask is not an infringement of anyone's right to just be kind to someone else. We all need to look out for each other.

You are losing a ton of business. People are shopping in small towns like Scott City, Chaffee and other small areas simply not to have to wear mask in a store. You are going to end up shutting down all of the small businesses in your area. They are not going to survive this. This is a human decision and if the person wishes to wear a mask or not, the choice should not be violated. People who are scared or sick should stay in. Those who are not should have the right to continue on with their life.

## Q1

Please share any comments below:

From a fourth grade student at St Paul Lutheran School,  
"I am over covid. I want to be with my friends. I want to never wear a mask ever again."  
Her teacher shared this note written on an assignment.  
This is a very dangerous mental state for someone so young.  
Our children, who are not at risk, are depressed, angry, sad, and slipping away into their own worlds due to this feeling of isolation.

---

## Q2

Please share any comments below:

I, personally, am deeply saddened by the mask mandate.  
I'm so confused by how it was implemented, the lack of evidence to mandate a mask, the abrasive leadership that says, "just do it or else."  
I fought for freedom and liberty. I can not explain how empty it feels to walk around our County and see everyone so angry. People are angry because they feel castrated, forced to wear a mask. People are angry at those not wearing the mask because they think non-mask wearers are uncaring. Everyone is angry. And I feel so sad inside. No one feels free. No one feels happy in this community. I have approached the Commissioner, our elected state representatives, our school superintendent, the health board, trying to just understand why this has happened in our community. And, my elected representatives shrug their shoulders. The school superintendent says he does not owe a parent any justification for his decision. And the health board is a wall. And, I feel sad inside. I feel lost as an American. All these people rule my life, and none of them 'owe' me any answers. I'm told constantly to just conform, even though no one can tell me what the mandate achieves. Conform. But, I fought for freedom and liberty. I fought for democracy in another country. Only to come home and be told, your voice does not matter. Conform, do as your told even without reason given by your leaders. And, any question raised on the County Health page is met with a barrage of hate, personal attacks, emotional tirades. Do as your told or you will be attacked.  
And, I'm so sad inside.  
This is how the mask mandate affects my life.

---

We are a free country, at least we are supposed to be. This mask mandate takes away my freedom to choose. You have no authority over my freedoms. There are plenty of studies to show that the masks do not work. It is virtue signaling only. It makes people feel better that they think they are saving people. But the truth is we need to go on with our lives, let our children go to school (NO MASKS), protect the vulnerable and let this virus run its course through the young. STOP THE MASK MANDATE!!!! STOP TRYING TO MANDATE FEAR!!

I am thankful for the mask order. I think the number of cases would be even higher without it. I would wear a mask regardless; but there are many people who are only wearing one because it's a legal order. Unfortunately, there are also a lot of people not abiding by the order. They either totally ignore it, or they only wear a mask part of the time, or they think they don't have to social distance if they're wearing a mask, or they don't wear the mask correctly, or their mask isn't made properly. And some employers are not enforcing the order. Some of my coworkers don't wear masks in the common areas (ex. supply room and hallways). Even if there's no one within 6 feet of them at the time, someone is likely to enter that common area before they leave. I feel that people are using Provision 1c of the mask order as a loophole. And I am concerned about aerosols lingering in the air.

---

**Q2**

Please share any comments below:

It's bad enough that there are asymptomatic and pre-symptomatic people who don't realize they're contagious. However, I also know of people who had symptoms and didn't quarantine while waiting for their test results. And I know of people who have possible COVID symptoms, but don't get tested, either because they assume it's just allergies or a cold, or even worse because they don't want to quarantine. There is an additional problem of doctors who are giving poor advice because they don't think the disease is as serious as the scientists and media say. Confidentially .... I know someone, from a neighboring county, who went to the ER on a Sunday evening, with high fever, chills, sore throat. ER did a COVID test and sent them home. They had planned to leave for a vacation the next day. Supposedly, the ER doctor said, "If you feel sick tomorrow, don't go", when they should have said, "Stay home until you get your test results". When this person woke up the next day, they didn't have a fever, so they went. Had a fever by the time they got there, but went on and did lots of shopping and eating out. I doubt they wore a mask, because they hadn't up to that point. They got positive COVID results while they were there. There would be no way to do contact tracing. This person was supposed to come off isolation today, but developed a high fever and trouble breathing last night. Went to ER. They supposedly gave them a steroid and inhaler and sent them home. The person is talking about going back to work tomorrow, but said they would ask the county health department when they called today. (I hope they're not too backlogged to call this person today.) And I seriously doubt that their spouse has been quarantining or that they will quarantine for 14 days after this person's isolation ends (as recommended by the CDC for people who haven't taken precautions).

---

I would like all of this to remain confidential....I don't even feel safe going to health appointments. My orthodontist only wore a disposable mask and didn't pinch the nose piece, so it kept sliding below his nose as he leaned over me, examining my teeth and talking. And I have to go back for a longer appointment in the next couple weeks. My dentist acted like it's not a big deal. At the end of my appointment, before I could get up and put my mask back on, he took his mask off and continued talking, even though we were less than 6 feet apart. I went for an eye exam today and had to pull my mask below my nose two different times, for several minutes, because my exhaled air was fogging up the screens/lenses I was being tested with. The optometrist was wearing an N95 mask with an exhalation valve, which I've heard only protects the wearer. The room was small, he had to be in close proximity to me, and it was a long appointment. At the end of the appointment, he told me that he had been tested for COVID, due to an exposure, but that he was told he could go back to work, even though it hadn't been 14 days since the exposure, because he tested negative and doesn't have symptoms. He's a very nice person, and I know he was just going by what he was told. But I would have preferred to know that prior to the appointment, so I could have rescheduled. Now I have to decide whether it's safe to be with my relatives this weekend, as they are high-risk. It wouldn't help to get tested, even with a rapid test, because it's too soon for accurate results.

---

**Q4**

Please share any comments below:

I heard about this second-hand, so I can't personally verify the accuracy. Confidentially..... there is supposedly a medical employee who has COVID, and whose family has COVID, but this person is going to work (in Cape), because they don't want their office to have to shut down. I would have thought that the health department from the neighboring county would have contacted this person's employer, but I have heard that health department is swamped, so they may not have had time to do so yet.

Please end forced mask mandate. You do not know my health history and the extent of my medical exemption. neither does anyone else in Cape County. However, I am judged and reprimanded for not wearing a mask. YOU have done this to the citizens of the county. You are responsible for this strife between citizens.

---

**Q2**

Please share any comments below:

Please stop the forced mask mandate and regulation of small businesses. My beautician is struggling to stay afloat due to your regulations for HER business. How is she to pay her staff, feed her family, keep her house, and have health insurance. These are collateral damages resulting from YOUR forced mask mandate!

---

**Q3**

Please share any comments below:

Dr Russell was quoted in the SE Missourian last month in the coverage of the 9.22.20 HD board meeting that the evidence of mask-wearing may not be evident for months even YEARS!!!! This is not how you protect your citizens. YOUR actions should be VERY evident of helping otherwise the solution is worse than the problem!!! Stop the forced mask mandate!

---

**Q4**

Please share any comments below:

Contaminated masks blown out of trash cans. Where are the biohazard bins! Masks are SPREADING the virus. STOP THE FORCED MASK MANDATE! You are responsible for the increased cases, hospitalizations and deaths!

Please share any comments below:

I would like to see the board of health change its focus to protecting the elderly in long term care facilities and stop encouraging the harassment of county residents who are in no danger from the virus. Let us decide if we want to wear a mask or not.

---

**Q2**

Please share any comments below:

There has been a thousand percent increase in deaths since the mask order was implemented. In any other area those kind of results would be viewed as proof that what you had tried was ineffective and probably detrimental to your goals, yet in this case you keep insisting that something that is obviously not effective and is also causing division of our residents should continue. Why, just to do something even if it's wrong? Let people decide for themselves. What you are doing is not helping, it's making people angry and is reducing the public's confidence in the health departments ability to make wise decisions.

---

**Q3**

Please share any comments below:

My wife and I have been leaving the county to dine and shop and it's a great experience to go to a grocery store or lumber yard and see in some cases almost no one except older people wearing a mask. Smiling people who know they aren't at risk talking to others and enjoying their day is the direction our county should take also. Some people chose to wear masks and of course that's fine.

---

**Q4**

Please share any comments below:

I'm sure by now you've heard of the Great Barrington Declaration. Written by scientists and endorsed by hundreds of other doctors and scientists. It says what we've known for a long time which is the more young people get the virus the safer our older residents will be. The strategy the health department has implemented hasn't worked and the longer this drags on the more older county residents will die. I know it will be difficult for you to change virus strategies but please take the time to reflect on the possibility of doing something different.

I would also like to say I hope you aren't tempted to try a tougher lockdown. I am certain the people will not stand for it and it would result in a level of civil disobedience I hope we never see in Cape county.

**Q1**

Please share any comments below:

If masks are helping then why are the numbers being reported going up? I wear one when I go into stores out of respect for the establishment. It is what I was taught. I do not like them however. I see a few families in these places who do not have them on. It cannot be that 4 people in a family who have issues and unable to wear one. More likely they are making a statement. But that is their issue. I say that people be responsible for their own lives and well being. If I choose to wear one then it is my body and my choice. Naysayers will say the mask protects others! If that is true then again why are the numbers not declining? Since the mask mandate went into place there are more people wearing a mask in public establishments than ever did early on. I would guess the percentage jumped from 10% to 85% or greater. But the number of cases keep rising according to reports. Why? If they work shouldn't the numbers decline if the wearers go up? I will wear mine when I am supposed to but you have to understand that the media controls the narrative and people are seeing the same thing as I am. If it does not make sense you get push back. And what is the exit strategy? People want to know. And why is every city, county, etc all doing different approaches? Address what the people want to know like why you cannot get covid sitting a table 4 feet or less from the other table but you can on the walk to the table. There are TOO many variables and people do not understand. Maybe you should spend some time reading, learning and listening to what the people are saying and take that into account. A blanket order is so government! You cannot address every issue with one law, order, etc. People have different paths.

Regarding requiring masks in the county, we need to continue this as the local case rate shows no sign of decreasing and the science on this is irrefutable.

Where I work we all wear masks and practice social distancing, as much as possible, but it is all for naught if out in the public masks are not worn and people don't take other common sense precautions. Please take a leadership role on this.

**Q1**

Please share any comments below:

Preventative measures for the Coronavirus, as far as, social distancing, mask wearing, vaccination (for future reference), have all failed dramatically for prevention of Coronavirus transmission over the entire world's. To continue the rhetoric that these are helpful to prevention are not just flat out false claims but also encourage behavior that leads to worse disease spread and discouragement of behaviors that actually help immune system function.

---

**Q2**

Please share any comments below:

This is the first time our health department and any health department have taken dramatic steps toward preventing infectious disease, and as shown previously, by two facts, has failed at large. 1. Americans following these guidelines still record at 33rd on health and wellness, Healthcare comparisons with other countries. Cape Girardeau County should never be on national news for Coronavirus spreading through our county and that is not a people not following the mandate issue but because the county is prone to direction of health by doctors that don't know immune systems but know medicine. Secondly, measure in place are for a population set that has never been put before the health of society. It makes zero sense for the 80-100 group of people leading our moves bc they should be following these safety guidelines at all times but more so one to help their deficient immune system. Putting this population group who is "in danger " before the health and wellness of those who are not...IE mandates, lockdowns, shutdowns, social distancing is showing to be detrimental to the mental and physical health of ages 0-79, aka people who have less morbid disease and less likely to have complications due to the coronavirus.

---

**Q3**

Please share any comments below:

The US, State, County health departments have over stepped their boundaries as governing bodies to the people who are suppose to be served and not controlled by the health department. The US, State, and department have led the US people that the way to prevent transmission of the virus is to wear masks, socially distance, focus on hygiene, and wait for a vaccine...none of which will slow down the inevitable transmission of this virus. Consider your steps not for short term principles but for long term outcomes and this will provide clarity on which way you should be moving.

---

**Q4**

Please share any comments below:

Shutting down the country, especially small businesses and changing school attendance for children will have long term consequences to the individuals and country. Do not make these decisions based on election outcomes, but consider your duty to the county and how Cape Girardeau could be a light to show other counties the way. True health and wellness lies within the body..not outside of it. This is true from age 0-100 and from spotless to comorbidity. Healing and wellness occur within.

**Q1**

Please share any comments below:

As positive Covid-19 cases continue to rise in Missouri, I would like to see the face mask mandate continued, actually I would like to see the mandate extended in Cape County through the fall and winter flu seasons in Cape County. According to the CDC, masks are most likely to reduce the spread of COVID-19 when they are widely used by people in public settings. Wide use of masks especially helps protect those at higher risk of severe illness from COVID-19 as well as workers who frequently come into close contact with other people. Using masks along with social distancing, frequent hand hygiene, and cleaning and disinfecting frequently touched surfaces are the most effective strategies available for reducing COVID-19 transmission, according to the CDC. Please extend the mask mandate in Cape County.

Thank you for this opportunity to voice my opinion.

I support medical health freedom of choice especially concerning mask and vaccine mandates. I believe decisby the HD are biased and are not based on all the available scientific research by health experts. A local person with high creditionals (PhD in data research) giving info on covid research was essentially ignored and disregarded . I believe a forced,mandatory health action must be brought to a vote by the People,. There is no longer a crisis or emergency. We were allowed to vote on the seat belt law, the PEOPLE must be heard and the Constitution followed.

The longer this pandemic goes on the less seriously I think people in our community are taking it. We all have "Covid Fatigue" but this virus doesn't care that we are tired of it. I wish we didn't have to have a mask mandate, but the fact is is fewer people would be wearing them if we didn't have an order in place. Frankly, I'm wondering if it's time we implement more restrictions to curb the spread of this virus? Should bars/restaurants be allowed to be open for indoor services? Nationally, health officials are sounding the alarm about how this virus will spread in the fall and winter. We can't take our foot off the gas when we are seeing 30 to 40 new cases every day. We need to do more to protect the public health. While I wish we could rely on individuals to be responsible, the evidence doesn't suggest we are all behaving responsibly. I understand 2020 has felt like an eternity, but this virus has been around less than a year. It's killed 1 million people worldwide. 50 in our county alone, more than 500 in our region. We can, and must do better.

I am the sole caretaker for my disabled spouse. I do everything I can to protect myself from COVID. If I get sick and have to quarantine or go into the hospital there is NO ONE to care for my husband and he might have to go into a care facility. His doctors have warned that he would most likely not survive if he is infected. So this is literally a matter of life or death for us. I stay home as much as possible, but occasionally I must go out to get supplies or go to the doctor. Right now, with the mask mandate in place, there are still MANY people running around without them. If you all drop the mandate, I fear that the public will view that as an "all clear" sign and even more people will stop wearing them. I'm sure there are many others like me who just want to stay safe. PLEASE keep the mandate in place!!

Q1

Please share any comments below:

Please keep the mask mandate in effect. Our numbers are still high and will only go higher with the upcoming holiday season. Before the mask mandate only about 2% of the people wore masks and now 98% of them do. This makes shopping a lot less anxious for me. Since we are all part of a society, we have a civic responsibility to protect others from contracting this disease. I'm so tired of these people who gripe about their civil liberties being infringed upon by the mask mandate. Their liberties end when they are endangering the lives of others. So when they choose not to wear a mask and they unknowingly pass this covid to someone, that is no different than manslaughter to me! Most people will wear a mask if there's a mandate, but if the choice is theirs, they won't, so please keep the mandate in effect. Thank-you! I'm also concerned about the River Valley Craft Fair that is planned for the week-end of November 21st and 22nd. All the other craft fairs have cancelled, but not this one. People attend these craft fairs from St, Louis, southern Illinois, Tennessee, Arkansas, and Kentucky. With this being the only craft fair, this will be more packed than ever, making it a super spreader event! I don't know if your department can do anything about putting a stop to this or not, but if so, this would keep the virus from exploding so exponentially in this area. Thanks for all you guys do. I know you've been treated viciously by some protesters over this mask mandate, and I know a lot of people's prayers are with you. Keep up the good work.

In regards to the continuation of the mask mandate for the county, I would like to say that I believe it should be continued. We have laws that are put into place in order to protect ourselves and others. For example, I am not allowed to drive 150 miles an hour on the highway because it puts my life as well as the lives of others at risk. The mask mandate is no different. Our individual rights stop when they put lives in danger.  
Thank you

**Q1**

Please share any comments below:

First, thank you for all you do for the citizens of Cape County. My comment is an favor of maintaining the mask ordinance. We are approaching the holiday season as well as the traditional cold and flu season. While the numbers are declining somewhat, there are still a lot of cases, and I fear that with colder temperatures and more people being inside (restaurants, shopping for christmas, etc), that the cases will skyrocket if masks are lifted. Masks may also help to ease the effects of cold and flu. I know that for me if the mask order is lifted, I will not be going anywhere again, as I barely go now. I understand many do like the masks, but this needs to be a consideration for the entire community, and wearing a piece of cloth when you go to Wal-Mart is a small task that can save lives. Thank you again and I hope that the mask mandate is kept in place for now, until the numbers consistently stay lower instead of up and down every day.

Page 1

**Q1**

Please share any comments below:

It is reckless and irresponsible to mandate something that requires education and training, but then fail to provide that education and training. Medical professionals are trained to touch their masks only upon putting them on and taking them off. The health department has mandated masks but has done next to nothing to educate the public about when to wash masks, when to replace masks, how to put on and remove masks, and how to store masks. This is guaranteed to spread disease. It is the health department's job to ensure that what they mandate is carried out correctly.

A few weeks ago, I attended an installation which had many speakers. All wore masks, which they removed when they got to the podium to speak. Every speaker placed his mask in the same spot. This was obviously unsanitary and dangerous.

This month, I also witnessed women discussing how disposable masks with designs are too cute to throw away. At least 10 women said they wash their disposable masks and reuse them.

If Covid is such a threat, people should be very concerned about mask hygiene. However, the public is not taking it upon themselves to learn how to wear masks safely. The health department needs to help educate people, or it needs to remove a mandate that causes people to bring harm to their health.

---

**Q2**

Please share any comments below:

Masks mandates violate religious beliefs. There is very little information showing masks protect people from Covid. There is an abundance of information that masks have no effect on the spread of Covid and that masks may increase the risk of respiratory illness. I believe the studies showing face masks used by the public increases the risk of disease. Forcing me to wear a mask forces me to wear a lie. My wearing a face mask tells others I believe masks work. The Seventh Commandment requires that we do not give false testimony. The health department's mandate forces me to break God's commandment. In addition, forcing churches to comply with the mask mandate is a violation of the separation of church and state. This mandate must not be extended, and religious freedom must be allowed, as it is protected in the First Amendment to the United States Constitution.

---

**Q3**

Please share any comments below:

Mask mandates cause people to forgo social distancing. People use masks like a security blanket. Security blankets give no protection, but they give people a feeling of protection. That in turn causes people to skip other healthier practices of preventing Covid, such as washing hands and social distancing. One friend of mine who is immunocompromised wishes mask mandates would be repealed. Before the mandate, people kept their distance from her. With the mandate, she says she struggles to go anywhere because people come so close, they brush up against her. Please do not extend the mask mandate so that people are encouraged to practice more effective ways of limiting Covid.

---

**Q4**

Please share any comments below:

People who are worried about Covid have their fears increased by mask mandates. Masks are a very visual reminder that the world is not right, and it increases anxiety, which is itself a dangerous disease. Whenever a person is not able to wear a mask, the public reacts with great fear. This month, a mother shared with me that her son's teacher called her, saying that her son would not keep his mask on at school. When she met her son at the bus stop later that day, her son had his mask tied to his face so that he was unable to remove it. Her son is three year old. This is child abuse. Mask mandates provoke fear more than they decrease disease risk. It is time to end this mandate.

---

**Q1**

Please share any comments below:

Masks increase fear and anxiety among people who cannot wear masks. I have a medical inability to wear a mask. So does my five year old. When I have to go somewhere, I am afraid of a confrontation. I am afraid someone will hurt me. I am afraid someone will hurt or shame my child. Because of this, we avoid Cape as much as possible. The anxiety created by the mandate when I go out is unbearable. The depression created when I stay home because of this mandate is dangerous. The depression is paralyzing despite medication, supplements, and counseling. Many health officials are pointing out that the wave of depression and anxiety is a second pandemic. As someone suffering immensely with anxiety and depression, I beg you to look at the fear mandates create and end this mask mandate.

---

**Q2**

Please share any comments below:

Mask mandates are difficult for abuse survivors. I have two friends who were smothered while they were raped. As a result, they have panic attacks while wearing masks. If they choose to protect their bodies from panic attacks, they still have to explain themselves at every door they go through in Cape Girardeau. They still must say, "I have a medical condition" every time they go anywhere in this city. Every time they must do so, it is a reminder of what was stolen from them. It is a reminder of their trauma. As a survivor of sexual assault, I cannot imagine what my friends must go through when they try to accomplish even the simple task of buying food. It is vital that the health department recognizes the harm mask mandates create for people who cannot wear them, especially abuse survivors.

---

**Q3**

Please share any comments below:

Mask mandates encourage discrimination. At the last health department board meeting, a man testified that a coworker died of an asthma attack while wearing a mask. A board member responded with, "That's her fault." It was not that woman's fault that she was faced with being forced to wear a mask despite doctor's orders or lose her job and receive no unemployment. I have a friend who chose to quit a job and receive no unemployment rather than wear a mask against doctor's orders. I also quit a job and received no unemployment because I cannot wear a mask. To force someone to make that choice is discrimination. In addition, many have been denied medical treatment if they cannot wear a mask. I had been receiving treatment for an autoimmune condition. I cannot wear a mask. Because of the mask mandate, I cannot receive treatment unless I choose to wear a mask against my family doctor's orders, which will cause me to become extremely ill with a migraine. Mask mandates are not making people healthier.

Please do not extend this mask mandate, because if you do, you extend the encouragement to practice discrimination.

**Q4**

Please share any comments below:

Listening to one's body and giving the body what it needs is important. A mask mandate teaches the public to ignore the body's cues. People suffer headaches, migraines, sinus infections, respiratory infections, and asthma while wearing masks. People have even passed out. Yet they continue to wear the masks despite what their bodies need because of the mask mandate. It is the opposite of health to ignore what is necessary for the body. The health department has a duty to protect health, and the health department has failed to do so. The mask mandate needs to end so that the public will return to the healthy practice of supporting their bodies.

Why aren't there signs put in store windows explaining that some people are exempt from wearing a mask due to health issues and they will be allowed into the store to shop and not required to leave. Nor will they be questioned by the young sales associates ( aka mask police ) to explain their medical issues under HIPPA laws.

Why are employers now allowed to discriminate against their employees who for medical reasons with a doctors statement are still not allowed to work?

---

Please stop forcing our children and grandchildren to live in fear and suffer needlessly. Mask or no mask they are still getting sick. Mine have and suffer under a mask trying to breath while sick with a cold. Listen to your kids explain their day like this and see if you don't come up fighting for their rights to breath.
